FIRE FIGHTING

Description

Eight (8)-hour course intended for Response Team members.

Course Objectives

Teach participants the following themes :

- Knowledge of fire and extinguishing methods ;
- Portable fire extinguisher classifications ;
- Selection of portable fire extinguishers and fire nozzle ;
- Knowledge and use of portable fire extinguishers and fire nozzles.

Through briefings, workshops and drills, participants will learn how to :

- Understand the chemistry and physics of fire, and ensuing extinguishing principles ;
- Understand portable fire extinguisher classifications ;
- Fight a fire using a portable fire extinguisher ;
- Fight an incipient fire and, in case of evacuation, protect the exit using fire hoses ;
- Correctly use the various nozzle jets based on type of fire and response needs.

This course is intended for :

- Members of Emergency Response Teams in the industry and public services ;
- Health, Safety & Environment Managers and Specialists ;
- Consultant Experts.
