WHMIS TRAINING

Description

Four (4)-hour course for employees in the industry, including hands-on training with Material Safety Data Sheets.

Course Objectives

Teach the principles and procedures to identify hazards related to the use of hazardous materials in the workplace, by explaining and demonstrating the following :

- Regulatory requirements ;
- Hazardous material classifications ;
- Protective actions and equipment ;
- Safe work principles.

Through briefings, workshops and drills, participants will learn how to :

- Identify hazards ;
- Take required protective actions ;
- Select protective equipment and use it ;
- React in case of spill or contamination ;
- Work safely.

This course is intended for :

- Health, Safety & Environment Managers and Specialists ;
- Employees who may be required to work with hazardous materials.
